

FURO

Home. Cozy & warm

About Furo

Home.
Cozy &
warm.

In fast-moving times more people are choosing to slow down and assess what really matters to them. The comforts of home, family and a secure future.

Furo is a heart-warming brand that is in love with contemporary design while enabling real human connection. All this in a smart way offering comfort like we know in an eco-friendly way. Furo is happy to share its secret with everyone, not just with the happy few.

We bring warmth and coziness to every home so that anyone can enjoy heart-warming moments with their loved ones.

We are designing a beautiful smart fireplace that can be installed anywhere while offering an easy-to-use, safe and ecological alternative to a traditional fireplace.

Why Furo

A
fireplace
for every
home.

At Furo, we believe that a cozy home is a fundamental right for everyone. We understand that a fireplace has the power to create a warm and inviting ambiance, bringing people closer together. With this in mind, we have crafted a beautiful bioethanol fireplace that can seamlessly fit into any type of home, adding comfort and charm to your living space. Our promise to you is a genuine fireplace experience to your home, bringing the warmth and intimacy of a real fire into your everyday life.

A fireplace for every home.

As we become more aware of the impact of climate change, it's essential that we make changes to reduce our reliance on fossil fuels. One way to do this is through energy-efficient homes that are heavily insulated and utilize clean energy sources. However, these homes often lack the traditional warmth and coziness of a fireplace.

This is where Furo comes in. We recognize that the comfort and ambiance of a fireplace are still a must-have in modern homes. To provide a fireplace that can be placed anywhere, we have chosen to use biofuel.

Bioethanol is a clean energy source that doesn't emit CO, smoke, or soot, making it the perfect choice for every type of home. Biofuel doesn't require a chimney or gas connection, giving homeowners the flexibility to create a cozy atmosphere in any type of home.

Newly built ecofriendly houses

There is a growing trend towards building homes that are gas-free, without chimneys and with heavy insulation.

Apartments

They're perfect for apartment living, where chimneys and gas outlets may not be available.

Renovations

Homeowners looking to renovate their homes without the hassle of installing a gas connection or chimney. During renovations, one is frequently confronted with fireplaces that are no longer up to standard or are in the wrong place according to the new design.

Any other house

Why not choose Furo in any other house? You will avoid the complexity of chimneys or conducts and you will make a green statement in helping the environment.

With biofuel, Furo can fulfill its promise of providing the coziness of a fireplace in every home, without compromising on environmental sustainability. By using biofuel in our fireplaces, we are taking a step towards a cleaner and more sustainable future.

Biofuel

Bioethanol is a form of alcohol derived from biomass. It is produced through the fermentation of sugars extracted from natural sources such as plants, algae, or surplus wine. The prefix "bio" is added to highlight its environmentally friendly production process. In addition, bioethanol is considered a carbon-neutral fuel since its combustion emits the same amount of CO₂ that the plant absorbed during its growth phase. As an alternative to fossil fuels derived from petroleum, bioethanol is widely regarded as a more ecologically responsible choice.

and natural
flame view.

BIO-O! 70-120 | See-through

BIO-O! 70-120 | See-through

A real fireplace creates an unrivaled ambiance of warmth and coziness that cannot be replicated by anything else. Even when not in use, its natural setting adds character and charm to any living space. At FURO, we understand the importance of this essential element in a beautiful bio-fireplace. The ultra-thin burner nestles seamlessly into a pebble or wood decoration. The undulating, hypnotizing flames are the heart and soul of our fireplaces. Together with the natural crackling sound, our biofires create a stunning

focal point that will enchant your senses.

The burning process

Burning bioethanol in its pure form, gives a stunning and authentic fire view. It is therefore a conscious choice that we make to ensure that this principle is preserved. Our burners are smart designed to guarantee complete combustion. A beautiful flame with a minimum of consumption.

We truly did design the
most beautiful and
coziest flame.

FURO

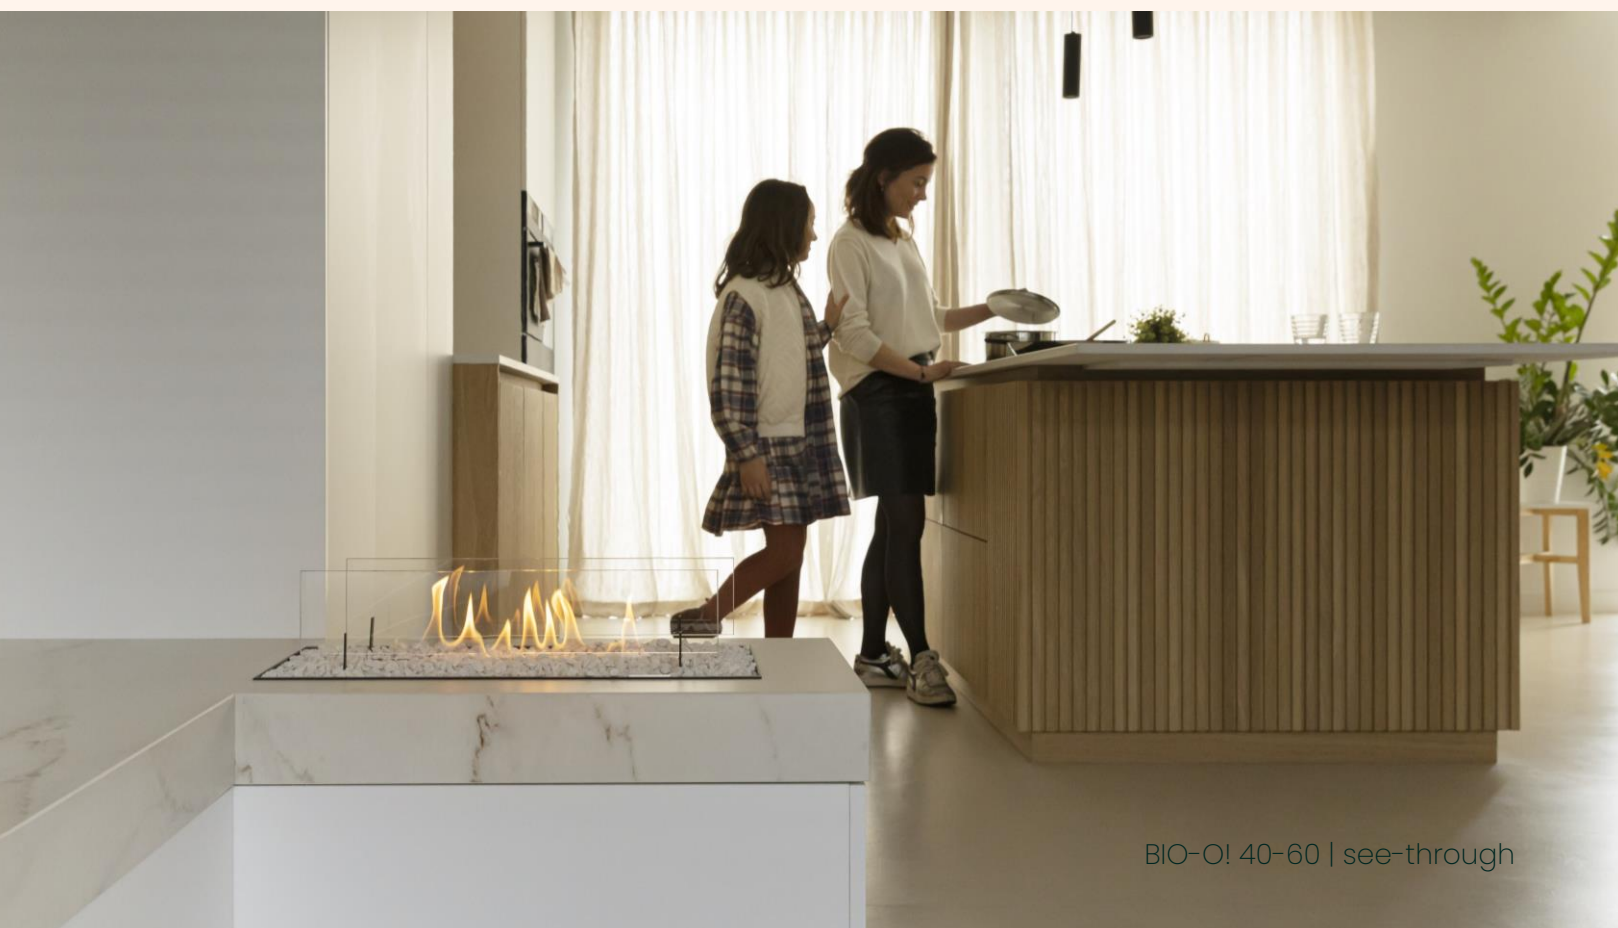

Freedom of design.

Every home possesses a unique character, and the choice of interior design speaks volumes about its occupants. With so many different styles available, it's wonderful to have options. Furo's minimalist design, coupled with the choice of pebble or wood decorations, allows the fireplace to seamlessly blend into any interior.

One of the greatest advantages of Furo fireplaces is their versatility in placement. You can install them anywhere in your home since they don't require a chimney, gasinlet or -outlet.

The Furo was intentionally designed with a low built-in depth and a separate reservoir for flexible placement. This feature provides full freedom in designing your fireplace to meet your specific needs and preferences.

With Furo, you can explore endless possibilities and experiment with various ideas to create a fireplace that complements your home's aesthetics. The flexibility in design options makes Furo an excellent choice for anyone looking to add warmth and style to their living space.

BIO-O! 40-60 | see-through

FURO

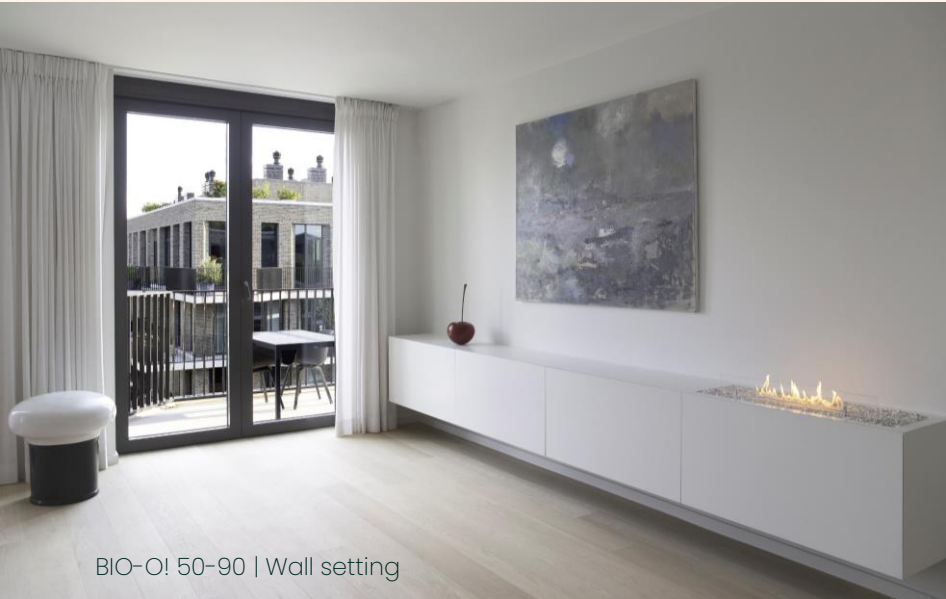

Charm of wood

Our logset decorations are made from the highest quality materials, expertly crafted to resemble real logs, and strategically placed to create an authentic flame effect. Opting for our logset decoration will give you the added benefit of a mesmerizing flame that dances between the logs.

BIO-O! 40-60 | Firebasket

Gathering around a cozy fire has always been a great way to spark meaningful conversations with your loved ones.

Enjoy those precious moments.

Ease of use

A cozy fire sparks great conversations. Enjoy every minute of this quality time. Do not waste too much time tending to your fireplace. Focus on having fun and creating memories that last a lifetime.

Imagine the perfect fireplace, one that brings cozy warmth on demand. Furo's minimalist design features just two knobs that provide easy and intuitive control. Ease of use in contrast of today's increasingly complex electronic products.

Behind its easy-to-use control system, Furo fireplaces incorporate a host of advanced technologies and smart design elements that offer optimal comfort and safety.

The user experience is straightforward and intuitive. With just a simple push of a button, you can turn the fireplace on and off. The advanced electronics will fill the burner with fuel and will light the fire automatically. The electronics will continue to monitor the burning process until the system is switched off, ensuring safety and peace of mind. Our smart system will communicate with a convenient light on the burner about the status of fuel, temperature, process... And with a 10-liter storage tank, you can enjoy several evenings of uninterrupted comfort without worrying about refueling.

FURØ

A safe homely feeling.

Our top priority is your peace of mind and the safety of your loved ones. That's why we've taken every precaution to ensure that our fires are as safe as need be. Enjoy the fire carefree with your family and friends.

BIO-O! 40-60 | See-through

BIO-O! 40-60 | See-through

With Furo, you can rest assured that you are getting a product that prioritizes safety without compromising on performance.

At Furo, we take safety seriously and believe that smart design is the key to achieving it.

Separation of fuel supply and flame

Our BIO-O! fire is designed with the most important safety principle in mind: the separation of the fuel supply and the flame. We've set up the 10-liter storage tank separately so that it never comes into contact with the fire. We carefully infuse the biofuel, ensuring that the system holds no more than a few centiliters of bioethanol at any given time. This approach guarantees safety.

Minimal fuel consumption

Our biofires feature a unique design that produces a beautiful flame with minimal fuel consumption. They are designed to burn bioethanol efficiently, reducing oxygen consumption in the room to a minimum. Nevertheless, it's still important to ensure proper ventilation when burning bioethanol to maintain a healthy indoor air quality.

Safety sensors

Furthermore, we've incorporated well-thought-out electronics equipped with sensors that monitor the combustion process closely, ensuring safe operation at all times. If any abnormalities are detected, the system will automatically turn off to prevent potential hazards.

Child lock

Our biofires come with a child lock feature.

CE certification

You can have peace of mind knowing that our biofires comply with CE standards and are certified by KIWA, meeting the highest safety and quality standards.

Technical specifications

Plug & play

Our fireplaces are designed with ease of installation in mind. Simply hang or place the appliance in its designated location, plug the power cord into the socket, connect the tube to the external fuel tank, and voila! You can start enjoying your new fireplace.

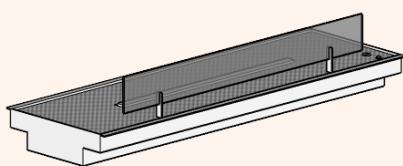

While the installation of a Furo fireplace is generally straightforward, it's important to use fireproof materials around and above the fire for safety reasons. To simplify the installation process, in case of a "one-side-open" setting, we offer optional standard cassettes that provide a fireproof environment for your fireplace.

With Furo, creating your own cozy and safe fireplace has never been easier.

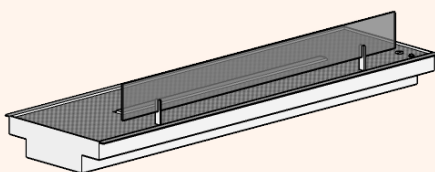

BIO-O! 40-60

Dimensions (w x h x d):	590 x 120 x 300 mm
Length fireline:	400 mm
